STACK: REACT JS, HTML, CSS, JAVASCRIPT, BOOTSTRAP, GIT, GITHUB

PROFESSIONAL PROFILE

When I started in the world of programming in **JavaScript**, I was interested in knowing everything related to this programming language to get the most out of web development. I really like working with technologies in Vanilla, although I have knowledge in the use of libraries for styles such as **Bootstrap**, and my first goal was to learn everything necessary in **JavaScript** to make a great use of it in **ReactJs**.

I am currently developing in **ReactJs**, this is my first goal achieved. For new challenges I want to learn about other **JavaScript Frameworks**, and enter in the world of **Backend**.

PROJECTS

What u want to drink?: This is an app to search and save your favorites cocktails. Here you can find the instructions and ingredients for make them. Web site created using create-react-app. **Techs used:** React JS, Bootstrap.

Stared Lyrics: This is a web app where you can find the lyrics of your favorite songs. I made this app for practice my skills with React using the Api of Lyrics Ovh. **Techs used:** React JS.

Note-calories: Note-calories is a web app created for try to control the calories that people eat at day. You just need to put the food's name, the food's weight, and the food's cals. This app doesn't show how many calories are in your food when you put in, you have to know how many cals you're eating. With Note-calories you control the consume at day. **Techs used:** HTML, CSS, JAVASCRIPT (**API: Local Storage**).

Dots-game: : Dot's game is a web app where you plus points when you touch the dots. Three levels by three levels a new dot will be on the screen. When you level up and level up the dots will move faster, their size will change too, so you have to be focus. Luck!. **Techs used:** HTML, CSS, JAVASCRIPT (**API: Local Storage**).

SOFT SKILLS: work team, high communication, responsibility, problem resolution, adaptability.
